

QUALITY AND SUSTAINABILITY POLICY

The Management, considering the context, the sustainable development goals, and the needs of relevant stakeholders, bases the company's sustainability on economic, environmental, and social aspects.

QUALITY AND SUSTAINABILITY POLICY

The Management, considering the context, the sustainable development goals, and the needs of relevant stakeholders, bases the company's sustainability on economic, environmental, and social aspects.

Economic development based on:

- A global, agile, and quality service oriented towards customer needs and satisfaction.
- The pursuit of excellence through interaction with our clients and suppliers.

Environmental protection and pollution prevention. Therefore, our commitment includes:

- Reducing greenhouse gas emissions through the use of renewable energy sources, energy efficiency, and emissions offsetting.
- Promoting eco-design and the use of materials with a lower environmental impact.
- Optimizing waste management.
- Extending our sustainable development criteria throughout our supply chain.

Our social commitment leads us to:

- Promote a positive and lasting impact on the local community where our work takes place.
- Develop policies that enable professional growth, equality, and a positive work environment.
- Ensure the safety of our employees and collaborators.

All of this drives the continuous improvement of service, environmental performance, and the social impact on which Servis bases its long-term strategy, ensuring strict compliance with applicable legal and regulatory requirements.

To achieve these objectives, Management considers it essential to have a management system to develop its policy in accordance with the international standards ISO 9001:2015 and ISO 14001:2015.
